Flag Status: Flagged

Good evening,

By now you have seen the RAC Bulletin regarding the above. Similar to the NTRG (National Training Resource Group) report in 2007, this process will review how we deliver Amateur Radio resources to our customers, how we communicate to our members, how they communicate with us, how training is provided to our members, what technology is employed among other things. Nationally, it is anticipated that this process will help to bring some of the non ARES affiliated Emcomm groups under our umbrella organization, or at least vastly improve the manner in which we interact through sharing of training opportunities etc.

So what I am asking of you in this process is to form a "steering committee" along with each of your SEC's to "push" information down to members of your section and back up to our working committee lead by Ian Snow VE3QT and Hew Lines VA7HU. You will be hearing from them further a little later on.

Many thanks for your continued support of the RAC - ARES. It's appreciated!
